## Our methodology

We assess companies according to a framework of approximately 140 criteria divided into 4 pillars: Environment, Social - Own Workforce, Social - External Stakeholders, and Governance. The methodology is based on a double materiality approach (impact materiality and financial materiality) in line with the principles established by the CSRD and the EFRAG guidelines. We update our rating framework annually depending on the results of previous years and emerging ESG risks (new criteria, level of detailed information by answer, rating algorithms, etc.).

Under each pillar, the topics are weighted differently according to the results of the sector-specific double materiality analysis: the topics identified as most material in terms of the rated entity's activities weigh more heavily in the score of the associated pillars. The same applies to the pillars: the greater the weight of a pillar, the greater its impact on the final ESG score.

The outcome is an ESG rating as well as a rating for each of the 4 pillars of the assessment (Environment, Social- Own Workforce, Social – External Stakeholders and Governance) and each of the 15 underlying sustainability topics. Ratings are provided in absolute value and on a scale from 0 to 100.

The analysis is backward-looking. It focuses on data from the last three reporting years. The exception is the controversy research, which is carried out in real time and impacts the scores at the end of each month.

The overall ESG rating takes account of a penalty associated with any controversies linked to the company ESG practices:

- *No controversy identified*: the overall rating is unchanged
- *Low exposure*: 3-points penalty
- *Significant exposure*: 8-points penalty
- *High exposure*: 15-points penalty
- *Critical exposure*: 20-points penalty

The overall ESG rating takes account of a bonus associated with the positive impact of the company's products and services, based on the share of company's turnover that contributes positively to the SDGs:

- < 10% : 1-point bonus
- [10% ; 25%[ : 2,5-points bonus
- [25% ; 50%[ : 5-points bonus
- [50% ; 75%[ : 7,5-points bonus
- [75% ; 90%[ : 9-points bonus
- >=90% : 10-points bonus

The evaluation process is as follows:

1. Collection of public ESG information for the past 3 years
2. Data quality control
3. Dialogue with the company to complete and clarify the data collected
4. Checking the consistency and homogenisation of data
5. Calculation of scores and publication of data

For more details (including the disclosure requirements under the EU Regulation 2024/3005), please consult the methodology document publicly available on EthiFinance's website:

## ESG Scorecard

### Overall rating over 3 years

This graph shows the ESG rating under the EthiFinance ESG Ratings 2025 framework for the past three years. The scores range from 0 to 100, 100 being the highest score.

### Controversies Exposure & Products and Services Impact

EthiFinance ESG Ratings has not identified any significant controversies for Lhyfe.

The company's controversies can be consulted on request.

At the date of this publication, EthiFinance ESG Ratings considers that Lhyfe makes a contribution to the Sustainable Development Goals (SDGs) estimated at 100% through its products and services, resulting in a bonus of 10 points to its overall ESG score.

### Detailed Scores

The table hereinafter highlights the details of the scores by pillar (ESG). The benchmark used includes all companies in the Energy & Utilities sector rated during the 2025 EthiFinance ESG Update, i.e. 90 companies.

Rating	2022	2023	2024	Trend 2023-2024	Benchmark *
Controversy penalty	0	0	0	=	
Products & services bonus	10	10	10	=	
Overall ESG Rating	70	85	88	↗	↑
ENVIRONMENT	59	72	81	↗	↑
SOCIAL - OWN WORKFORCE	80	86	87	↗	↑
SOCIAL - EXTERNAL STAKEHOLDERS	10	55	75	↗	↑
GOVERNANCE	55	74	72	↘	≈

\* Colour Code for Benchmark

↑ The company outperforms the benchmark

↓ The company underperforms the benchmark
